INTRODUCING THE KOHLER AUXILIARY POWER UNIT (APU)

From independent operators to fleet owners, the KOHLER APU sees to it you Sacrifice Nothing.

KOHLER APU BENEFITS
- **More options** — The 3APU-HC offers ample power for basic needs, while the 7APU accommodates more intense power demands.
- **Low installation cost** — KOHLER APUs feature a self-contained design, keeping installation times to a minimum.
- **Emissions compliant** — Both KOHLER APUs are engineered to meet the latest EPA and CARB emissions requirements.
- **Quiet** — Under full load, the 3APU-HC operates at 69 dBA, the 7APU at 71 dBA.
- **Compact size** — Small enough to easily mount on side rails beneath cab.
- **Economical to own** — Kohler APUs burn less than 1/3 of a gallon of diesel fuel per hour under typical load, far less than idling.
- **Powerful support** — Kohler APUs come with a standard 2-year warranty on parts and labor, serviced by a national network of 500 Kohler distributors and dealers.

KOHLER 3APU-HC
- **Economical, Simple**
  - 55 amps of DC power
  - Space-saving evaporator and condenser provide 12,000 Btu/hour cooling and 10,000 Btu/hour heating
  - Custom sound-deadening enclosure
  - In-cab control shows run-time hours
  - Liquid-cooled engine
  - Complete stand-alone unit that does not intrude into the truck’s systems
  - Unit measures 15”l x 24”h x 28”d from frame rail and weighs approximately 240 lbs

KOHLER 7APU
- **Powerful, Efficient**
  - 13.1 hp diesel engine produces 6.5 kw output
  - Industry-leading 120 volts AC power, 45 amps DC power
  - Power to run heat, A/C, TV, microwave, block heater and charge batteries
  - Liquid-cooled engine
  - In-cab digital controls show run-time hours and monitor temperature, oil pressure and more
  - Complete stand-alone unit that does not intrude into the truck’s systems
  - Side-rail mounted APU weighs approximately 540 lbs and measures 25”l x 29”h x 24”d from frame rail

7APU In-Cab Climate Control – For additional flexibility, the KOHLER 7APU offers two options in compact under-bunk heating and cooling.

For more information on how a KOHLER APU makes life more comfortable, call 800-544-2444 or visit KohlerPower.com/mobile

SHUT DOWN WITHOUT GIVING UP COMFORTS

Kohler now gives over-the-road drivers a better way to get the power they need for heat, air conditioning and other comforts, without a moment of idling. With two different APU options, KOHLER APUs help everyone from independent operators to fleet owners save fuel, cut pollution and reduce wear on engines. Plus, they’re a powerful answer to state and local anti-idling laws.

SACRIFICE NOTHING

Kohler brings 85 years of generator expertise to the OTR trucker. That means access to a national KOHLER dealer/distributor network, a trusted name that helps you meet your challenges, products designed to make life easier and the ability to keep your comforts on the road.

Offering the best aspects of a battery and an APU, the Hybrid Power System is unlike any other anti-idling equipment. That’s because the Hybrid Power System combines the Bergstrom NITE® Plus System with a KOHLER® DC power unit. The result is a cost-effective, virtually maintenance-free, easy-to-install idle-reduction system. And with both anti-idling regulations and fuel costs on the rise, the Hybrid Power System puts you in the driver’s seat. Isn’t that where you want to be?

Introducing the Hybrid Power System from Bergstrom and Kohler
A revolution in anti-idling technologies
THE HYBRID POWER SYSTEM CONSISTS OF:

- DC POWER UNIT
- AIR CONDITIONING UNIT
- IN-CAB DUCT
- ESPAR HEATER

HERE'S HOW IT WORKS

Instead of idling, the Hybrid Power System provides stable power to the truck, allowing the owner to efficiently run the HVAC system. When the battery power levels decrease to low voltage levels, the low-battery indicator is triggered and the KOHLER DC power unit begins to recharge the batteries while keeping the Bergstrom NITE Plus System operating uninterrupted. Should the truck's battery also be depleted, the KOHLER DC power unit is able to recharge it. Because fuel is used only when the DC unit is recharging the batteries, very little is consumed. And when the Bergstrom NITE Plus System is running completely from battery power, it uses no fuel whatsoever and is 100% CARB compliant.

FEATURES AND BENEFITS

- **Fuel-Efficient**
  Because so little fuel is needed, this system is extremely cost-effective, even when used for lengthy periods of time, sipping less than 0.1 gph in recharge mode, 0.05 gph in heater mode and 0 gph in air conditioning mode.

- **Minimal Maintenance**
  There is virtually no maintenance on the batteries and air conditioning unit. And because the KOHLER DC power unit is used only to recharge the batteries, it requires very little maintenance.

- **Low Noise Levels**
  Advanced KOHLER engineering provides a custom sound-attenuated enclosure that keeps the DC power unit operating at 68 dBA in recharge mode and 50 dBA in heating and air conditioning mode.

- **Light, Compact Design**
  The frame-rail mounted KOHLER DC power unit weighs less than 250 pounds and measures a compact 15” x 28” x 24”. The space-saving design of the Bergstrom NITE System requires minimal room under the bunk, leaving plenty of usable storage space.

- **Emission Friendly**
  The Hybrid Power System is EPA Tier 2 certified and CARB compliant except for the minimal time when in recharge mode.

---

For more information on how the Hybrid Power System makes life on the road easier and more comfortable, contact 800.544.2444 or visit KohlerPower.com/mobile.
KOHLER MOBILE POWER SOLUTIONS
GENERATORS FOR COMMERCIAL AND RECREATIONAL VEHICLES.

When it comes to specialty commercial and recreational vehicles, Kohler Co. is the power and anti-idling leader. With over 85 years in the power business, we know that nothing is more important than product dependability. Every feature and technology built into our products must ultimately hold up to a rigorous battery of quality control testing. And all KOHLER® generators are backed with a comprehensive warranty.

Our range of gas and diesel generators provides you with the power to stay on the road – comfortable and confident – whether your speedometer reads 65 or 0. When it comes to service, Kohler sets the standard in the United States, and with each passing day we continue to grow stronger in our international markets, increasing our presence and our promise to give you the support you need.

DIESEL GENERATORS
Keeping size, noise, weight and emissions to a minimum, Kohler offers a solid line of diesel generators from 10 to 40 kW at 60 Hz and 9 to 33 kW at 50 Hz. Optional sound attenuated enclosures are available.

GAS GENERATORS
Available in 10-15 kW at 60 Hz, KOHLER gasoline generators offer heavy-duty power in a lightweight package. These little powerhouses are built to be quiet and compact, with minimal vibration.

MARKETS SERVED
Kohler has logged many miles over the last few decades, providing comfort, security and convenience for those whose work and life take them on the road. KOHLER gasoline and diesel generators serve the vehicle market in several applications including:

COMMERCIAL VEHICLES
- Police command vehicles
- Fire/rescue vehicles
- Race trailers
- Mobile medical vehicles
- Communication and media trucks
- Specialty utility vehicles

RECREATIONAL VEHICLES
- Luxury custom coaches
- Motor homes

KOHLER Auxiliary Power Units
With the increased cost in fuel and anti-idling laws, running your truck engine when you aren’t driving is no longer an option. Kohler offers two unique APU solutions for the idle reduction market. The 3APU is one of the lightest and most compact APUs on the market and will quickly pay for itself in less than 12 months. The KOHLER 7APU meets more intense load demands.
FEATURES AND BENEFITS

RELIABLE
KOHLER® mobile generators easily handle a variety of electrical equipment and even protect valuable onboard computer equipment from voltage fluctuations.

EASY TO MAINTAIN
Single-side access makes routine maintenance checks and serviceability easy.

WORRY-FREE
For everything from low coolant to low oil pressure, KOHLER mobile generators automatically shut down to protect against costly damage.

COMPACT
Because of their small, compact size, KOHLER generators allow customers to maximize the use of their vehicle space.

SOUND-ATTENUATED ENCLOSURES
Most KOHLER diesel generators feature sound-attenuated enclosures for superior noise reduction. Gas models do not have enclosures.

EMISSIONS COMPLIANT
KOHLER mobile diesel and gas generators meet current CARB and EPA requirements and feature reduced engine noise emissions due to innovative designs in the engine block, crankcase and fuel injection pump.

ADVANCED DIGITAL CONTROL
The exclusive KOHLER Advanced Digital Control system ensures that the generator starts up smoothly and protects sensitive electronic equipment from voltage fluctuations. The ADC also provides remote monitoring of up to 13 fault conditions through the SAE J-1939 CAN Bus output.
ADVANCING LIVING ENVIRONMENTS WORLDWIDE.

Kohler Power Systems didn’t become one of the world’s largest generator manufacturers by accident. We did it by dedicating every Kohler business unit to improving the places you live, work and play.

We strive to deliver products and services in ways that capture the essence of charm, good taste and generosity of spirit. And through a continued allegiance to industry-leading design and technology, a single level of quality consistently above the standard and service-minded attitudes, we believe those objectives can be met.

Right now, Kohler ideas and craftsmanship are at work making people’s lives better. Our plumbing products, exquisite furniture, engines and generators, hospitality and real estate are at the forefront of more gracious living.

For more information on MOBILE POWER SOLUTIONS, call 800-544-2444 to locate the nearest distributor/dealer or visit KohlerPower.com/mobile
Kohler Power Systems brings truckers a better way to keep their comforts in the face of growing anti-idling laws. Introducing the KOHLER® diesel auxiliary power unit (APU), one of the most economical and compact APUs on the road. The air-cooled, self-contained unit is installed with no intrusion into the truck’s critical systems. The KOHLER APU supplies DC power to charge the truck’s battery and provides complete heating and cooling for the cab – all without idling. So drivers keep their comforts while saving on fuel, engine wear and maintenance.

From independent owners to fleet operators, a KOHLER APU sees to it you sacrifice nothing.
The KOHLER® APU Makes Anti-Idling a Nonissue

KOHLER 3APU-HC FEATURES

■ **Light and compact** – This frame-rail mounted power unit weighs less than 240 pounds and measures a compact 15" x 28" x 24" H. The power unit can be mounted on the truck’s frame-rail two different ways using the same mounting brackets based on driver’s preference.

■ **Powerful engine performance** – Powered by an air-cooled, 4.7 horsepower engine; single-cylinder, 2550 rpm, 349 cc displacement.

■ **Simplified maintenance, solid performance** – The air-cooled unit uses a belt-drive alternator, which does not require intrusion into the truck’s system when installed. When synthetic oil is used rather than mineral oil, the KOHLER 3APU-HC requires an oil change only every 500 hours.

■ **Battery charging** – The power unit provides 55 amps to keep the truck’s battery charged at all times.

■ **Space saving** – The entire 3APU-HC unit does not take up any vital under-bunk storage space. Power unit and condenser are mounted outside of the cabin, and the evaporator is mounted on the wall inside the cab, leaving vital storage space free.

■ **Quiet operation** – A custom sound-attenuated enclosure allows the KOHLER 3APU-HC to operate at 69 dBA at full load.

■ **Control** – Complete in-cab start/stop and heating/cooling adjustments.

■ **Warranty** – Limited two-year.

The KOHLER 3APU-HC comes equipped with separate space-saving evaporator and condenser components. It provides an air-conditioning capacity of 12,000 BTU/hour and 10,000 BTU/hour of heating, independent of the truck’s climate control system.

**Evaporator:** Unique design provides four airflow cups to distribute the air evenly throughout the cabin.

**Condenser:** Space-saving design allows condenser to be mounted outside of cab, keeping vital under-bunk storage space free.

INTRODUCING THE KOHLER AUXILIARY POWER UNIT (APU)

From Independent operators to fleet owners, the KOHLER APU sees to it you Sacrifice Nothing.

KOHLER APU BENEFITS

- **More options** — The 3APU-HC offers ample power for basic needs, while the 7APU accommodates more intense power demands.
- **Low installation cost** — KOHLER APUs feature a self-contained design, keeping installation times to a minimum.
- **Emissions compliant** — Both KOHLER APUs are engineered to meet the latest EPA and CARB emissions requirements.
- **Quiet** — Under full load, the 3APU-HC operates at 69 dBA, the 7APU at 71 dBA.
- **Compact size** — Small enough to easily mount on side rails beneath cab.
- **Economical to own** — Kohler 3APU-HC burns less than 1/3 of a gallon of diesel fuel per hour under typical load, far less than idling.
- **Powerful support** — Kohler APUs come with a standard 2-year warranty on parts and labor, serviced by a national network of 500 KOHLER distributors and dealers.

SACRIFICE NOTHING

Kohler brings 85 years of generator expertise to the OTR trucker. That means access to a national KOHLER dealer/distributor network, a trusted name that helps you meet your challenges, products designed to make life easier and the ability to keep your comforts on the road.

SHUT DOWN WITHOUT GIVING UP COMFORTS

Kohler now gives over-the-road drivers a better way to get the power they need for heat, air conditioning and other comforts, without a moment of idling. With two different APU options, KOHLER APUs help everyone from independent operators to fleet owners save fuel, cut pollution and reduce wear on engines. Plus, they’re a powerful answer to state and local anti-idling laws.

KOHLER 3APU-HC

**ECONOMICAL, SIMPLE**

- 55 amps of DC power
- 13.1 hp diesel engine produces 6.5 kW output
- Industry-leading 120 volts AC power, 45 amps DC power
- Power to run heat, A/C, TV, microwave, block heater and charge batteries
- Air-cooled engine
- In-cab digital controls show run-time hours and monitor temperature, oil pressure and more
- Complete stand-alone unit that does not intrude into the truck’s systems
- Unit measures 15”l x 24”h x 28”d from frame rail and weighs approximately 240 lbs

KOHLER 7APU

**POWERFUL, EFFICIENT**

- 13.1 hp diesel engine produces 6.5 kW output
- Industry-leading 120 volts AC power, 45 amps DC power
- Power to run heat, A/C, TV, microwave, block heater and charge batteries
- Liquid-cooled engine
- In-cab digital controls show run-time hours and monitor temperature, oil pressure and more
- Complete stand-alone unit that does not intrude into the truck’s systems
- Side-rail mounted APU weighs approximately 540 lbs and measures 25”l x 29”h x 24”d from frame rail

7APU In-Cab Climate Control — For additional flexibility, the KOHLER 7APU offers two options in compact under-bunk heating and cooling. Choose from the space-saving remote unit or the easy-to-install, self-contained unit. Both offer 14,000 Btu/hour cooling and 2.5 kW heating.
